

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2005/005695

## A. CLASSIFICATION OF SUBJECT MATTER

Int.Cl.<sup>7</sup> C07D493/14, C07B53/00

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Int.Cl.<sup>7</sup> C07D493/14, C07B53/00

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

CAplus (STN), REGISTRY (STN)

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	JP 2004-35474 A (Suntory Ltd.), 05 February, 2004 (05.02.04), Full text & WO 2004/005296 A1	1, 3-8, 10, 12, 13
P, X	FURUTA, Takumi et al., Concise total synthesis of flavone C-glycoside having potent anti- inflammatory activity, Tetrahedron, 2004, 60(42), pages 9375 to 9379	1, 3-8, 10, 12, 13
P, A	WO 2004/092180 A1 (Daiichi Santori Fama Kabushiki Kaisha), 28 October, 2004 (28.10.04), Full text (Family: none)	1, 3-8, 10, 12, 13

☒ Further documents are listed in the continuation of Box C.☐ See patent family annex.

## \* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&amp;" document member of the same patent family

Date of the actual completion of the international search

01 July, 2005 (01.07.05)

Date of mailing of the international search report

19 July, 2005 (19.07.05)

Name and mailing address of the ISA/  
Japanese Patent Office

Authorized officer

Facsimile No.

Telephone No.

C (Continuation). DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
P, A	NAKATSUKA, Takashi et al., First total synthesis of structurally unique flavonoids and their strong anti-inflammatory effect, Bioorganic & Medicinal Chemistry Letters, 2004, 14(12), pages 3201 to 3203	1, 3-8, 10, 12, 13

# INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2005/005695

## Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2. ☐ Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
  
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:  
(See extra sheet.)

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
  
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  
1, 3 to 8, 10, 12 and 13.

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2005/005695

Continuation of Box No.III of continuation of first sheet (2)

Claims 1, 8, 10 and 13 and the parts depending on claim 1 in the inventions according to claims 3 to 7 and 12 (invention group 1) relate to a process for producing the compound represented by the formula (1), while claims 2, 9, 11 and 14 and the parts depending on claim 2 in the inventions according to claims 3 to 7 and 12 (invention group 2) relate to a process for producing the compound represented by the formula (4). As reported by the following document, these compounds are both publicly known and have no novel skeleton in common.

Such being the case, it does not appear that the invention groups 1 and 2 have a special technical feature in common and these invention groups are not considered as being so linked as to form a single general inventive concept.
